

RAM And Storage Theory

RAM Comparison (Task 1) :-

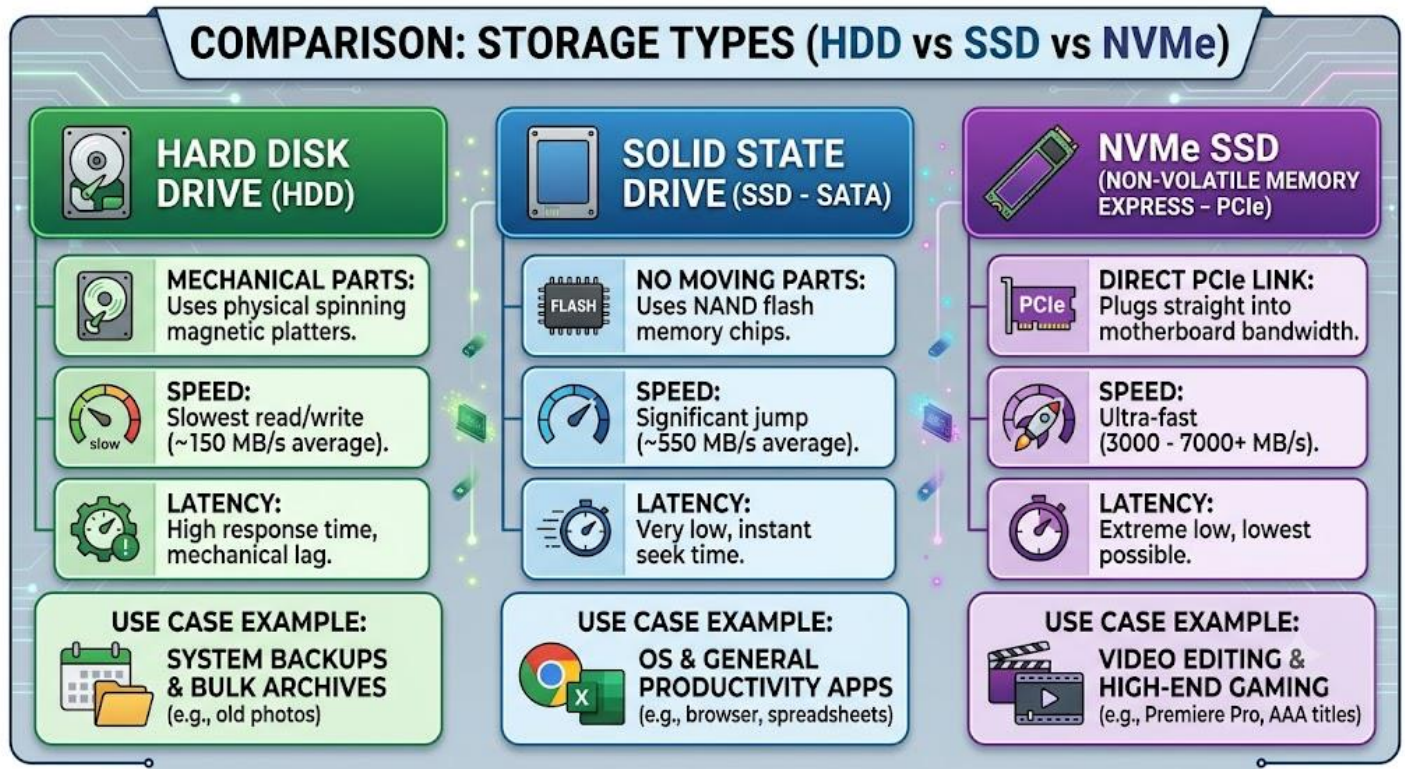

RAM GENERATION COMPARISON			
Key Differences between DDR3, DDR4, and DDR5			
Feature	DDR3 RAM	DDR4 RAM	DDR5 RAM
 Speed (Transfer Rate)	 800 – 2133 MT/s	 2133 – 3200+ MT/s	 4800 – 8400+ MT/s
 Voltage	 1.5V (Standard)	 1.2V	 1.1V
 On-Die ECC	 None	 None (Standard DIMMs)	 Included (Standard on all DIMMs)
 PMIC (Power Management)	 On Motherboard	 On Motherboard	 On-DIMM Chip
 Typical Use Cases	Older Legacy PCs, Office Desktops 	Budget Gaming Rigs, Office Laptops, Servers 	High-End Gaming, 4K Video Editing, Modern Workstations 

Slide 2: RAM Practical Task (Task 2)

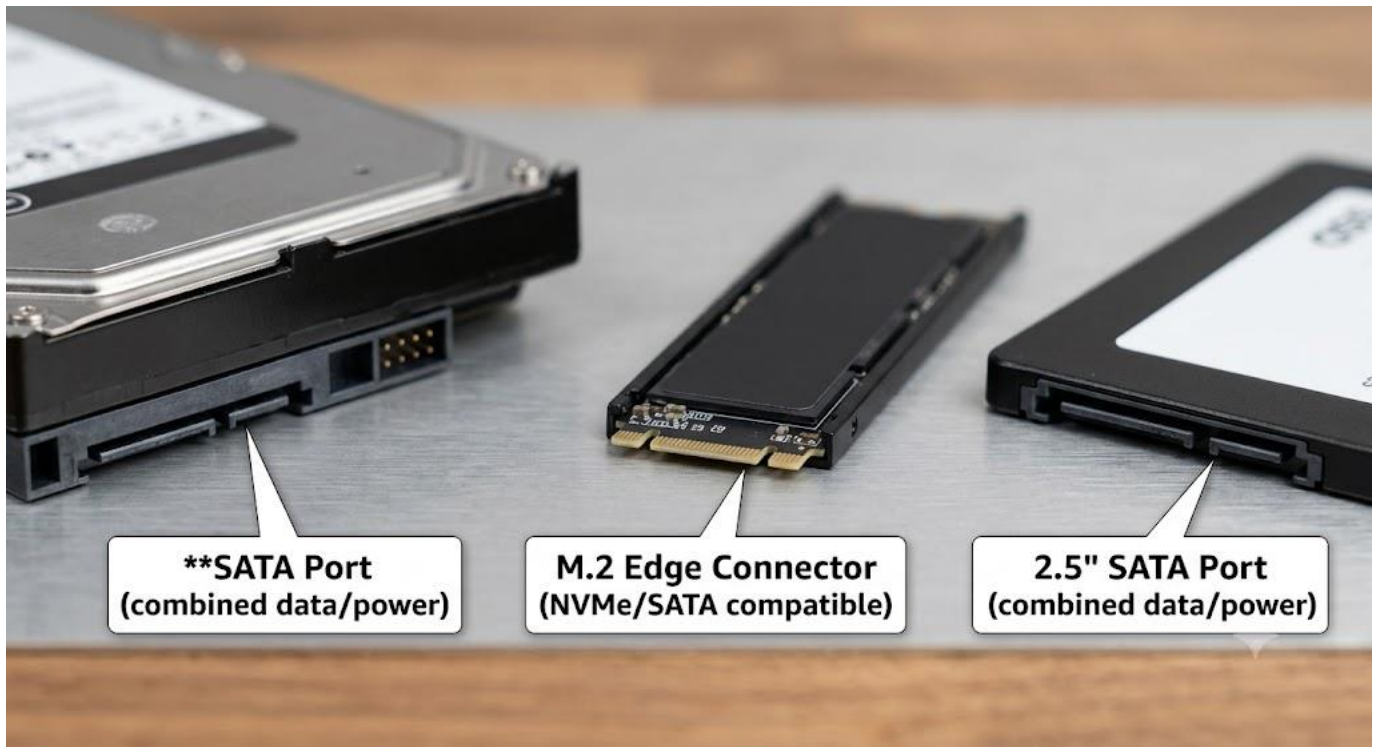

- **Action Completed:** Safely removed and carefully reinstalled the RAM module.
- **Result:** System successfully booted up with no memory errors.

Slide 3: HDD vs. SSD vs. NVMe (Task 3)

Slide 4: Storage Drive Practical Task (Task 4)

- **Action Completed:** Storage drive removed and properly reseated.
- **Result:** Device successfully recognized the storage drive upon restarting.
